TMEIC Exhibit at Hannover Messe Show

ROANOKE, Va. (April 8, 2009)-- TMEIC will exhibit "engineered motor & drive systems" for a wide range of industrial applications, including oil & gas, at the Hannover Messe 2009 Show April, 20 to 24, in Germany. For further information on our integrated drive solutions for energy saving and environmental preservation, please visit our booth in Exhibit Hall 15, Stand D34.

TMEIC is a world class leader in industrial systems integration, contributing to production technology and management of the environment with cutting-edge technology. Our core technologies lie in the rotating machinery that serves as the driving force for factories and plants, the power electronics which transform and control the required electric power, and the engineering that lies behind the planning and realization of the plant as a whole. It is in these core areas that our cutting-edge technology contributes to production and environmental management. "We make production possible."

Energy conservation and new energies - technologies that coexist in harmony with the global environment are required in order to maintain sustained industrial and social growth. We are committed to revolutionize innovation in industrial systems, in areas such as green technology. TMEIC strives to aid its clients, helping the production process evolve towards the realization of environmentally sound "green" factories:

- A shift from turbine drives to motor drives (E-drives).
- The realization of green energy systems through power conversion, system cooperation, and stabilization technologies.

About Hannover Messe

HANNOVER MESSE remains the world's leading showcase for industrial technology. It is the ideal place to obtain the latest industrial know-how. Established sixty years ago, HANNOVER MESSE today ranks as the leading international showplace for industrial technologies, materials and product ideas.

Over the years the focus has shifted from stand-alone components to end-to-end solutions. Technical innovation is one key element in the success of HANNOVER MESSE. Another is its sharp focus on the creative application of existing knowledge.

Only at Hannover can the visitor experience complete value chains and swap information with experts from a complete spectrum of industrial sectors.

In 2009, 13 flagship fairs of international renown are being featured at HANNOVER MESSE as the world's largest and most important showcase for industrial technology. Among them is the brand new **Wind** trade fair. This year's keynote theme at HANNOVER MESSE is **Energy Efficiency in Industrial Processes**.

About TMEIC GE

TMEIC GE is a joint venture between TMEIC (a joint venture between Toshiba & Mitsubishi Electric) and General Electric in the industrial drive systems business. TMEIC employs 2,200 people around the world and has annual sales in excess of \$2B. TMEIC GE is built on the combined and proud heritage of these companies, delivering customer success--every project, every time. www.tmeicge.com
